100% real and valid exam dumps can ensure you pass at the first attempt

**Exam** : **C1000-083**

**Title** : **Foundations of IBM Cloud V2**

**Vendor** : **IBM**

**Version** : **DEMO**

**NO.1** Which statement describes the IBM Cloud Paks?

- A.** Collections of IBM Cloud services which have been designed to cater for different categories of business challenges, with the goal of accelerating a customer's journey to the cloud
- B.** Discounted bundles of containerized software licenses for deployment on premises, to be used as a stepping stone for the customer to smoothen their journey to the cloud
- C.** Containerized IBM software products each of which have been designed to serve a dedicated business requirement
- D.** Containerized software solutions that includes collections of IBM middleware and common software services for development and management on top of a common integration layer

**Answer:** D

**NO.2** An organization wants to replace several legacy applications with an IBM Cloud platform service. They need to ingest information using the MQTT protocol, present information on dashboards and apply machine learning to detect trends. What IBM Cloud service should the organization use?

- A.** The Node-Red starter kit
- B.** Internet of Things (IoT) platform
- C.** Watson OpenScale
- D.** The Node.js Express starter kit

**Answer:** B

**NO.3** Which statement describes the IBM Cloud Pak for Integration?

- A.** It helps deploy on your choice of clouds, with low-code tools for business users and real-time performance visibility for business managers. Customers can migrate their runtimes without application changes or data migration, and automate at scale without vendor lock-in.
- B.** It helps support the speed, flexibility, security and scale required for all of your digital integration transformation initiatives, and comes pre-integrated with a set of capabilities including API lifecycle, application and data integration, messaging and events, high speed transfer and security.
- C.** it helps to provide consistent visibility, automation, and governance across a range of hybrid and multi cloud capabilities such as event management, infrastructure management, application management, multicluster management, edge management and integration with existing tools and processes.
- D.** It helps to uncover hidden threats, make informed decisions about the risks they pose, then respond faster to those threats - while leaving data where it is. Customers can integrate tools and connect workflows across hybrid, multicloud environments, using a platform that runs anywhere.

**Answer:** C

**NO.4** What is one reason to choose a Single Cloud Environment over a Multicloud Environment ?

- A.** Vendor lock-in policies are negotiable
- B.** A Single Cloud Environment is always more cost effective in comparison to Multicloud
- C.** The shared security responsibilities between the Cloud provider and the Cloud consumer is easier to define in a Single Cloud Environment
- D.** The risk of vendor lock in is reduced with a Single Cloud Environment

**Answer:** B

**NO.5** An organization is building a cloud native application and wants to use the highest level of cryptographic security available. Which IBM Cloud service can the organization use for key management?

- A.** Hyper Protect Crypto Services
- B.** Cloud HSM
- C.** Key Protect
- D.** Hyper Protect Certificate Manager

**Answer:** A
