100% real and valid exam dumps can ensure you pass at the first attempt

Exam : **FOCP**

Title : **FinOps Certified Practitioner**

Vendor : **Linux Foundation**

Version : **DEMO**

NO.1 Which of the following would be the correct description of what a 'cluster' is in Kubernetes?
(Select One)

- A. A template of services to be ran in Kubernetes
- B. A group of server instances, managed by container orchestration.
- C. A template of a container with the software that needs to be run.
- D. An instance of a container image

Answer: B

Explanation:

There are a number of terms for Kubernetes that we need to be aware for the exam. It can be challenging at first to confuse a cluster, pod, service, image, namespace, etc. Please review the table here [Container Costs](#)

NO.2 Each major cloud provider labels the platforms 'allocation metadata' a specific way.
How does GCP name the allocation metadata? (Select One)

- A. "Resource tags", "Linked Accounts" and "Organizations"
- B. "Resource tags", "Linked Accounts" and "groups"
- C. "Labels" and "billing accounts"
- D. "Subscriptions", "resource groups" and "resource tags"

Answer: C

Explanation:

GCP uses "labels" and "billing accounts";

AWS "resource tags", "Linked Accounts" and "Organizations"; Azure "Subscriptions", "Resource Groups" and "resource tags" We do need to know some cloud provider specific terms for the exam.

Refer here before the exam [FinOps Terminology](#)

NO.3 Which of the following terms are associated with Agile? (Select Two)

- A. Zones
- B. Rightsizing
- C. Subscriptions
- D. User Story
- E. Sprint

Answer: D E

Explanation:

There are several terms affiliated with Agile development such as Sprint, User Story, Epics, Lean, etc. Rightsizing, Zones and Regions are cloud computing terms. Sprint a short interval of work in an Agile project, usually a week or two weeks but sometimes more or less, during which time an agreed-upon amount of work will be delivered User Story in Agile, user stories typically illustrate a desire or requirement for the software to fulfill.

Please review the Terminology page before the exam.

NO.4 When rightsizing your containers which of following would be focused on responding dynamically to different conditions? (Select One)

- A. Autoscaling

- B. Load Balancing
- C. Cluster Rightsizing
- D. Node Rightsizing

Answer: A

Explanation:

Autoscaling provides the ability to respond dynamically to different conditions, such as increased or decreased demand. This can take some architecting and iterative adjustments to get right for your application, and there is room for waste along the way. However, the more tightly your horizontal pod autoscaling (when we need more / less pods) and cluster autoscaling (when do we need more / less nodes) are configured, the less waste and unnecessary cost to run your application. Please review this page before the exam. (Section Optimize)

NO.5 Your FinOps lead has requested all cloud expenses and would like to understand all costs realized and paid for this quarter.

What type of expense would consider this? (Select One)

- A. Costs of Goods Sold (COGS)
- B. Weighted Average Cost of Capital (WACC)
- C. Capital Expenditure (CAPEX)
- D. Operational Expenditure (OPEX)

Answer: D

Explanation:

When you capitalize something, it becomes an asset of the company, whether or not it gets expensed within a specific period (CAPEX). If it benefits only the current period, then it's an expense that is expended in this period with no future benefit, making it an operational expense (OPEX).

Capitalization causes total outlays to differ from expenses in a similar period, with the delta being that which is capitalized.

NO.6 Which are the correct FinOps Principles? (Select Six)

- A. A centralized team drives FinOps
- B. Engineering is solely responsible for cloud usage
- C. FinOps reports should be accessible and timely
- D. Teams need to collaborate
- E. Everyone takes ownership of cloud usage
- F. Take advantage of the variable cost model of the cloud
- G. Business Value of cloud drive decisions
- H. All decisions are centralized thru finance

Answer: A C D E F G

Explanation:

Correct Answers

- 1) Teams need to collaborate
- 2) Business value of cloud drives decisions
- 3) Everyone takes ownership of cloud usage
- 4) FinOps reports should be accessible and timely

- 5) A centralized team drives FinOps
- 6) Take advantage of the variable cost model of the cloud

Before the exam you must review this page! <https://www.finops.org/framework/principles/>

NO.7 Your organization has recently adopted a FinOps based method for dealing with cloud costs and adopting FinOps. Currently, your organization has recently completed 'Step Two' for FinOps culture in your company.

What would the next stage for the organization to accomplish? (Select One)

- A.** Socializing FinOps for adoption in an organization
- B.** Planning for FinOps in an Organization
- C.** Enforcing mandates for cloud spend.
- D.** Preparing the organization for FinOps

Answer: A

Explanation:

The next step after Stage 1 - Planning for FinOps in an Organization (Laying the groundwork) is the Stage 2 - Socializing FinOps for adoption in an organization. Then After Step 2 would be Stage 3 - Preparing the organization for FinOps Please reference this page before the exam. Adopting FinOps

NO.8 In FinOps decisions are driven by the business value of the cloud? True or False?

- A.** False
- B.** True

Answer: B

Explanation:

Cloud has been commonly looked to a 'Cost Center'. With FinOps we look at the cloud as a business value creator. One of the main roles of FinOps is to maximize the value of the cloud spending.

Reference EdX Course Course /Chapter 1.

What Is FinOps? /FinOps Principles

NO.9 FinOps is the practice you will use to achieve value in the cloud, by bringing together finance, technology, and business groups to master the value of cloud and bring our organizations competitive advantage.

- A.** True
- B.** False

Answer: A

NO.10 What term is used to describe the ability to identify and allocate costs to the appropriate cost categories in use by a customer? (Select One)

- A.** CAPEX
- B.** Depreciation
- C.** Capitalization
- D.** Cost Allocation

Answer: D

Explanation:

In FinOps, the ability to identify and allocate costs to the appropriate cost categories in use by a

customer. Ideally direct costs (the cost of resources running in my accounts), amortized costs (the amortization of prepaid costs paid upfront for RIs applied in my accounts), and shared costs (my share of common services accounts run by others on my behalf) can be allocated to individual budgeting categories for a clear view of the entire cost of running my application or workload in the cloud. Please review the terminology page before the exam

<https://www.finops.org/resources/terminology/>

NO.11 AWS provides what is called a 'Blended Rate' on its invoices.

What is the blended rate showing? (Select One)

- A.** Shows the variable rate for a group of resources with the variable attributes.
- B.** Shows the effective rate for a group of resources with different attributes.
- C.** Shows the effective rate for a group of resources with the same attributes.
- D.** Shows the variable rate for a group of resources with the same attributes.

Answer: B

Explanation:

AWS provides Blended Rate information on its invoice showing the effective rate for a group of resources with the same attributes where some of the resources are receiving a discount from reservations and some are not.

Terminology is a critical knowledge area for the exam.

<https://www.finops.org/resources/terminology/>

NO.12 This domain includes the capabilities that look at past and current spend, set baselines and budgets, and then forecast spend.

- A.** Performance Tracking & Benchmarking
- B.** Cloud Usage Optimization
- C.** Organizational Alignment
- D.** Understanding Cloud Usage & Cost

Answer: D

NO.13 FinOps Practitioners use _____ to provide insight into how well an organization is doing with cloud spend. (Select One)

- A.** Cloud Performance Benchmarking
- B.** Cloud Networking Reports
- C.** Cloud Billing Reports
- D.** Cloud Tools

Answer: A

Explanation:

Benchmarking is important because it provides a reference to measure against. There are both internal and external benchmarks to consider as well. Reference Edx Course.
