100% real and valid exam dumps can ensure you pass at the first attempt

Exam : **H13-431**

Title : **HCIE-Data Center (Written)
V2.0**

Vendor : **Huawei**

Version : **DEMO**

NO.1 The rapid service automatic issuance based on the application template includes the following parts, and which order is correct?

1. The controller automatically converts the logical network into a physical & virtual network configuration
2. Administrator creates VDC/VPC graphics/ template to create a logical network
3. Unified presentation of virtual and physical networks
4. Tenant/user select business template

A. 3->4->2->1

B. 1->4->2->3

C. 4->2->1->3

D. 1->3->2->4

Answer: C

NO.2 Which of the following description is wrong about ManageOne OC Operations Center?

A. ManageOne OC does not affect the value of the actual work without the eSight docking.

B. The deployment of ManageOne OC relies on the deployment of ManageOne SC, which must be planned and deployed in a package.

C. Deploy the unified operation and maintenance management system (OC) at the central node to connect the cloud resource monitoring information and the non-cloud resource monitoring information of each data center to the eSight.

D. ManageOne OC usually needs to deploy eSight in each data center to handle local operation and maintenance operations, configuration, and monitoring data collection.

Answer: B

NO.3 Cloud network integration business process, which of the following description is wrong?

A. The AC-DCN discovers the location of the virtual machine through LLDP, and implements the logical port to go online.

B. Nova notifies Neutron to create a virtual machine port when creating a virtual machine instance.

C. The cloud platform creates a VXLAN type network through Neutron.

D. The virtual machine port is bound to the OVS bridge and encapsulates the VXLAN VNI.

Answer: D

NO.4 In the Huawei SDN solution cloud network integration scenario, which of the following description of the overall solution architecture is correct?

A. Network Control Layer: VAS services are provided by physical or virtual devices.

B. Service collaboration layer: The AC northbound is docking the OpenStack Neutron, and the cloud platform service model parameters are delivered to the A

C. Computing access layer: Network and policy configuration for VM access by vSwitch.

D. Network service layer: Supports the docking the Huawei FusionSphere cloud platform + Huawei ManageOne cloud management platform.

Answer: C

NO.5 On the Huawei SDN solution vDC active-standby disaster recovery-active and standby egress scenarios, an active/standby external network can support multiple outlets to form one active and

multiple standby.

- A. False
- B. True

Answer: A

NO.6 On the Huawei SDN solution, which of the following description on the DC service management network of vDC active and standby DR solutions is wrong?

- A. Configure a static route between the third arbitration site and the core switches of the two DC management zones.
- B. Manage the access switch as a Layer 3 access
- C. Dynamic routing is deployed between the management core switch and the management network FW between the DCs, and the network route between the management areas in the DC is opened.
- D. Manage the core switch as the Layer 3 gateway of the management network and configure VRRP.

Answer: B

NO.7 Which databases are the relevant data of Huawei OpenStack cloud platform services stored in? (Multiple Choice)

- A. SQL Server
- B. MongoDB
- C. Oracle
- D. GaussDB

Answer: B,D

NO.8 Which services are provided by VAS in the following Huawei Cloud Data Center? (Multiple Choice)

- A. IDS
- B. Router
- C. FW
- D. LB

Answer: A,C,D

NO.9 The FusionStorage agent process is deployed on each node to implement communication between the nodes and the FusionStorage Manager. What is the module?

- A. FusionStorage Agent
- B. MDC
- C. OSD
- D. FusionStorage Manager

Answer: A

NO.10 The following is about IPS device, which is wrong?

- A. NIP device also has the function of preventing DoS.
- B. IDS devices do not have defense capabilities, but can be attacked by linkage with the firewall.
- C. IDS devices do not have defense capabilities, so they are generally deployed in side-by-side mode.

D. HTTPS traffic is encrypted traffic. IPS devices can't defend against HTTPS traffic containing viruses.

Answer: D
