100% real and valid exam dumps can ensure you pass at the first attempt

Exam : **HP0-D20**

Title : Architecting the HP Matrix
Operating Environment

Vendors : HP

Version : DEMO

NO.1 What are the defined levels of storage support for CloudSystem Matrix? (Select two)

- A. Matrix Supported
- B. Insight Software Support Matrix
- C. IS/IM Support Matrix
- D. Vendor Supported E. Matrix Certified

Answer: AB

NO.2 What does a building a converged infrastructure enable an enterprise to do?

- A. Shift resources from operations to innovation
- B. Manage data growth and complexity with minimal cost
- C. Focus IT on operations
- D. Customize server settings and add-ons

Answer: B

NO.3 What is the primary HP application for managing Virtual Connect environments across the data center?

- A. Systems Insight manager
- B. Virtual Connect Enterprise Manager
- C. Insight Control
- D. Virtual Connect Agents

Answer: B

NO.4 Name two ways to achieve a converged infrastructure. (Select two)

- A. Outsource IT resources to focus on operations
- B. Standardize, virtualize, and automate
- C. Buy as CloudSystem or VirtualSystem
- D. Access virtual resources through a self-service portal
- E. Migrate, consolidate, and configure
- F. Buy configure-to-order (CTO) components

Answer: BE

NO.5 What does Insight Remote Support Advanced provide that Insight Remote Support Standard does not?

(Select two)

- A. Detailed problem resolution information
- B. 24x7 remote monitoring
- C. Warranty/contract information
- D. No licensing fees E. Fault analysis

Answer: AC

NO.6 Which technology enables you to know how much time it takes for data to travel back and forth across an Ethernet network?

- A. Energy Efficient Ethernet

- B. Simple Network Time Protocol
- C. Network Time Protocol
- D. Precession Time Control

Answer: B

NO.7 Which technology reduces power consumption by automatically adjusting energy use on actual traffic among network devices in real-time?

- A. 3D Sea Sensors
- B. Thermal Logic
- C. Energy Efficient Ethernet
- D. Dynamic Power Capping

Answer: C

NO.8 How does HP defines a balanced virtual machine system architecture?

- A. Industry recommended best practice combination of 3.5 GB of memory and 400MG of I/O per virtual machine
- B. A redundant combination of extended memory, I/O, storage, and virtual machines in each enclosure
- C. The combination of computer power, I/O and storage that yields the best return on investment

Answer: C

NO.9 What is BladeSystem environment with virtual Connect Ethernet and Fibre Channel modules?

- A. Virtual Connect Fibre Channel
- B. Virtual Connect domain
- C. Virtual Connect network
- D. VCEM Repository

Answer: A

NO.10 Which business obstacle do customer typically face in a traditional network connection environment?

- A. Third-part Ethernet and Fibre Channel switches are not compatible with a converged infrastructure
- B. The blade switches must be small, resulting in a large number of switches
- C. The system administrator must add all new network connections, resulting in an increased management burden
- D. Application workloads must be spread across several servers for redundancy

Answer: C
